- ▶ A clear picture of what's possible, from transitioning a service to an operating model integrate cloud technologies, including security compliance

Are you ready to gain productivity from Cloud?

Do you have a workforce constrained by technology? Is mobility a dream not a reality? Is your current technology keeping your people chained to their desks?

Removing constraints

Enabling workforces to be mobile and productive by removing the constraints of legacy technology is often a challenge. Freeing critical business productivity applications and introducing innovative cloud based solutions is an answer. Our Assessment Service helps you fully understand your current environment and how to make that change.

Approach

Through on-site, in-person interviews, a technical examination, assessment toolsets, and a Readiness Assessment report we provide a clear summary and useful roadmap on successful implementation and adoption of Office 365.

Duration - 5 days

1 Day Envisioning

A preliminary Office 365 Deployment Plan including business and technology in the cloud objectives, and an overall adoption priority schedule

4 Day Planning and assessment

A detailed and customised Office 365 Deployment Plan describing your current environment and defining the desire future environment. A remediation checklist to detect and eliminate technical obstacles is also provided.
