 - ▶ ISO 27001, 20000, 27018, 9001 & 22301 certified by a UKAS accredited auditor

Network as a Service

Every service has connectivity as its heart to enable service to our customers, whether its firewall, load balancers or storage connectivity we've got it covered.

For physical connectivity in the datacentres, we offer the following services to meet your connectivity and hosting requirements:

- Ethernet ports from 100Mbps to 40Gbps
- Fibre Channel from 2Gbps to 16Gbps

Transit and bandwidth services:

- Inter region connectivity, provided in a scalable resilient manner at speeds from 100Mbps to 40Gbps
- Resilient, scalable Internet connectivity at speeds up to 10Gbps

See our complementary CloudRoute offering for connectivity to 3rd party sites including yours, AWS, Azure, N3 and PSN.

Firewall Services

Based on industry leading vendors Cisco and Checkpoint we offer physical firewall appliances in a single or split site design to cater for failover and DR scenarios.

Additional layer 7 services can be added using our Advanced inspection services.

Load Balancers

Providing load balancing services using our PAAS offerings with haproxy via Cloud control or physical and virtual appliances based on Loadbalancer.org and Kemp we've got your load balancing requirements covered from the small 2 node deployment to hundreds of nodes.

All of our offerings come with management and monitor offerings and are covered by our bolt on products including SIEM, patching and Compliance & Accreditation.

Why OCSL Managed Services?

The world of technology offers a wealth of remarkable options.

We'll guide you through them. Agility and flexibility are important, as business changes. We'll help continually push your digital potential and meet your ever-changing needs. More than just a service provider, we'll be your strategic, long term partner.
