OCSL
A CANCOM COMPANY

SIEM as a Service
Security Information and Event Management

Solutions Brief

Why OCSL Managed Services?

The world of technology offers a wealth of remarkable options. We'll guide you through them. Agility and flexibility are important, as business changes. We'll help continually push your digital potential and meet your ever-changing needs. More than just a service provider, we'll be your strategic, long term partner.

Have a unified view of your network

Our SIEM service collects, stores and analyses logs from your network, servers and applications. Access to better information ensures greater security, neutralising risks before they affect your business. Our expert teams offers 24/7/365 proactive security monitoring and management for events and incidents.

A stronger security view

Our service allows a greater view of what is happening within your network by incorporating our attack signatures, we can quickly identify malicious activity such as Bruteforce attacks or SMB exploits.

Two is better than one

Coupling our Advanced Security Service with our SIEM service, you can ensure that your data has the leading-edge protection it needs in your daily struggle against emerging cyber attacks . Our highly trained experts monitor systems and networks 24/7. Together, these two services quickly action alerts giving you the peace of mind you need to focus on running your business.
